Features

Touchscreen operation using a keypad

Use the smartphone without touch and gestures.

VoiceOver and TalkBack

VoiceOver and TalkBack can be heard through the built-in speaker and the earphone.

Multilingual typing

Enables typing in 27 languages and offers commands for selecting and editing text.

Call management

Facilitates making and receiving phone calls, accepting a second call, and dialing phone numbers directly.

Touch-ton

Allows for the use of touch-tone input for services like telephone banking and voicemail.

Voice assistant

Supports voice assistants such as Siri with the built-in microphone and the speaker.

Audio Remote

Can be used as an audio remote.

Flexible Hand Modes

Provides the option for efficient two-hand mode and convenient one-hand mode for on-the-go use.
